

MFcentral is Gone. Here's What You Should Do.

MFcentral's API shutdown in September 2025 left 100+ fintech platforms without portfolio import. Here are your options - and why CASParser is the fastest replacement.

CASParser Team · October 5, 2025

MFcentral's API Shutdown: What Happened

In September 2025, SEBI and AMFI shut down MFcentral's API, leaving over 100 fintech platforms without their primary mechanism for importing investor portfolio data. If your platform relied on MFcentral for mutual fund portfolio import, you're now looking for alternatives.

Let's break down your options.

Option 1: Account Aggregator

The government-backed solution.

Account Aggregator (AA) provides comprehensive financial data access with regulatory backing. It's the long-term solution for financial data aggregation in India.

Pros:

- Banking, MF, demat, and insurance data
- Government and regulatory backing
- Real-time data access

Cons:

- Your company must be a regulated entity (RBI/SEBI/IRDAI/PFRDA-registered)

- 5-10 months implementation (FIU registration, Sahamati certification, quarterly re-tests)
- ₹5-25 lakhs+ upfront cost
- Bonds, G-Secs, EPF, PPF still “Proposed” and not live
- Joint accounts and NRE/NRO accounts excluded
- Demat history capped at 2 years
- RBI Master Direction updated 9 times since 2016

Verdict: Great for long-term, but too slow for immediate needs.

Option 2: Build In-House

The DIY approach.

You could build your own CAS parser. Many teams consider this because it gives them full control.

Pros:

- Full control over the codebase
- Custom features and optimizations
- No vendor dependency

Cons:

- 3-6 months development time
- ₹10-50 lakhs+ development cost
- Ongoing maintenance burden
- Complex PDF parsing across multiple formats (CDSL, NSDL, CAMS, KFinTech)
- Must handle format changes when institutions update their PDFs

Verdict: Expensive and time-consuming. Your developers should build your core product, not PDF parsers.

Option 3: CASParser

The fastest MFcentral replacement.

CASParser is an API that parses CAS (Consolidated Account Statement) PDFs from CDSL, NSDL, CAMS, and KFinTech into structured JSON.

Pros:

- 5 minutes to integrate
- Starts at ₹999/month
- No regulatory approvals needed
- 97% parsing accuracy
- Multi-asset support (MFs + equities, bonds, AIFs)
- Gmail inbox integration
- White-label Portfolio Connect UI SDK

Cons:

- Not real-time (CAS is point-in-time)
- Investment data only (not banking, insurance)
- Requires CAS PDF as input

Verdict: The fastest, cheapest way to get portfolio import working right now.

Our Recommendation

Use CASParser now, implement Account Aggregator later.

Deploy CASParser in minutes to restore portfolio import immediately. For investment portfolio data, most platforms find CASParser covers everything they need without the regulatory overhead of Account Aggregator.

This gives you:

1. Immediate portfolio import capability (CASParser)
2. Long-term comprehensive financial data (Account Aggregator)
3. No gap in user experience

Get Started

- Free plan: 10 credits/month, no credit card required
- Documentation: casparser.in/docs
- Pricing: [Starts at ₹999/month](#)

Import External Funds Using CAS

Created by Anuj Jain, Modified on Thu, 29 Jan at 9:51 AM by Anuj Jain

Overview

A Consolidated Account Statement (CAS) provides a complete view of an investor's mutual fund holdings across different AMCs. Importing CAS into Investwell Mint helps brokers keep their clients' investment records updated without manual data entry, reducing errors and saving time.

Brokers can import external funds of their clients using two methods in Investwell Mint:

1. **CAS Import via OTP** – Sync transactions directly using MF Central's CAS API with **OTP authentication. This is only applicable in case you have taken MF Central Credentials**
2. **Uploading CAS File from CAMS** – Manually upload the investor's CAS file for import.

Both methods can be accessed from the same section in Investwell Mint:

Data Management > CAS Import.

The screenshot displays the 'Data Management / CAS Import' section of the Investwell Mint application. The interface is divided into two main columns, 'Method 1' and 'Method 2', each with its own set of input fields and a button.

Method 1: Sync transactions with OTP

- Buttons: **Existing Client** (selected), **New Client**
- Radio buttons: **Mobile** (selected), **Email**
- Input fields: **Choose Client** (with a search icon), **+91 Enter mobile No.**
- Button: **Proceed**

Method 2: To upload PDF manually, go to CAMS website and order detailed CAS since inception for your Investor.

- Input fields: **Choose Client** (with a search icon), **Password** (with a search icon)
- Button: **Upload**

The left sidebar contains a navigation menu with options like Dashboard, Clients, Leads, Folio Lookup, and Data Management (highlighted). The top right corner has links for Settings, What's New, Help, and Demo.

Method 1: CAS Import via OTP (Sync Transactions with OTP) **This is only applicable in case you have taken MF Central Credentials**

For Existing Clients

1. Click on 'Existing Client'
2. Select a client from the dropdown.
3. Enter their **registered mobile number or email**.

The screenshot shows the 'Data Management / CAS Import' page. A red box highlights the 'Sync transactions with OTP' section. Inside this box, the 'Existing Client' tab is selected. Below the tabs, there is a 'Choose Client' dropdown menu with a search bar. A list of clients is displayed, including 'Mohit Sharma', 'MOHIT SHARMA / ITIPS3023N', 'MOHIT SHARMA / ITUSP9090M', and 'MOHIT SHARMA / 1741080993104'. To the right of the dropdown is a radio button for 'Mobile' and a text input field for the mobile number, with a '+91' country code and 'Enter Mobile No.' placeholder. There is also a radio button for 'Email' and a text input field for the email address. A 'Proceed' button is located at the bottom right of the red box. To the right of the red box, there is a section for manual upload with a 'Choose Client' dropdown and a 'Password' input field. An 'Upload' button is at the bottom right of this section.

4. Enter the **OTP** sent by MF Central.

The screenshot shows the 'Data Management / CAS Import' page. A red box highlights the 'Verify OTP' section. Inside this box, there is a 'Verify OTP' heading, followed by 'OTP sent to XXXXXX0235' with a copy icon. Below this is a 'Resend OTP' link and a 'Submit' button. At the bottom of the red box, it says 'OTP expires in: 09:55'. To the right of the red box, there is a section for manual upload with a 'Choose Client' dropdown and a 'Password' input field. An 'Upload' button is at the bottom right of this section.

5. Click Submit – Funds will be **imported**.
6. If mapping is required, complete the mapping as described later in this article.

For New Clients

1. Click on 'New Client'
2. Enter the **client's PAN**.

3. Enter their **mobile number or email**.
4. Enter the **OTP** sent by MF Central.
5. Click Submit – A **new client is created automatically**, and their funds are **imported**.
6. If mapping is required, complete the mapping as described later in this article.

Note: If an existing client's PAN is entered as a new client, their funds will still be imported normally and mapped to the existing client.

Method 2: Uploading CAS File from CAMS

Before uploading the CAS file, brokers must first download it from the CAMS website. If they already have the CAS file, they can upload it manually.

How to Download the CAS File from CAMS:

1. Go to the **CAMS website**.
2. Select **Detailed CAS**.
3. Choose **Statement Type: Detailed**.
4. Select the period, ideally from the client's first investment date.
5. Enter the investor's registered **email address**.
6. Set a **PDF password** for security (required during upload).
7. The investor will receive the CAS file via email, which must be forwarded to the broker.

How to Upload the CAS File in Investwell Mint:

1. Choose the option on the right in the CAS Import screen.

2. Select the client and enter the **PDF password** you set while downloading the file from CAMS.
3. Upload the CAS File.

8. After uploading, the import will be completed. If mapping is required, complete the mapping as described in the next section.

Mapping & Validation (Common for Both Methods)

Mapping is needed when certain details in the imported CAS data don't match existing records. This can happen if an ARN, scheme name, or transaction type isn't recognized, or if a client's PAN isn't found. Manual mapping ensures accurate record-keeping.

- If ARN selection is required, select the appropriate ARN.

- If schemes are not mapped automatically, manually map them using the dropdown beside each scheme.

Data Management / CAS Import

Choose Client

1 Clients found in CAS, not found in Investwell. Enter client name and create in Investwell below.
0 new folios found in CAS without a PAN. They have been mapped to Mohit Sharma.

PAN in CAS
ANCP134xx

Enter Client name

Create Client

Proceed

- If a transaction type is missing, select it manually.

Once the process is complete, you can check the status of your import in the **CAS Import History** section, located below the CAS Import section.

Import Status Indicators

Choose Client		Choose Client	
Search...	☒ Mobile ☐ Email	Search...	Password
	+91 Enter mobile No.		Enter Password
Proceed		Upload	

Date	Clients	File name	Status	Actions
05-03-2025 10:56 PM	Akshit Nagar	CASImport_CAS_05022002-04032025_CP1817388	Success	
28-02-2025 5:37 PM	Rishi Jhala	CASImport_CAS_43422002-32345_AZ939475	Pending for Mapping	▶ Resume
27-02-2025 2:11 PM	Ayush Srivastava	CASImport_CAS_12082010-15022024_CP192837	Deleted	
11-02-2025 11:45 PM	Divyapal Choudhary	CASImport_CAS_30062015-01012025_CP2059482	Success	

- **Success:** The import was successful.
- **Pending for Mapping:** Mapping is pending for ARN/Schemes/Transaction type. Click on the three-dot icon beside it to **resume mapping** where you left off.

- **Deleted:** If a CAS file was imported by mistake, click on the three-dot icon to delete all the imported data.

Once the CAS import is complete, the transactions will be reflected in the system. You can now review the updated portfolio and analyze the investment data.

If you face any issues, feel free to reach out to our support team or raise a ticket.
